## About

**Rembrandt van Rijn** was a Dutch painter and etcher. He is generally considered one of the greatest painters and printmakers in European art and the most important in Dutch history. His contributions to art came in a period of great wealth and cultural achievement that historians call the Dutch Golden Age when Dutch Golden Age painting, although in many ways antithetical to the Baroque style that dominated Europe, was extremely prolific and innovative, and gave rise to important new genres in painting

The screenshot shows the Brackets IDE interface. On the left, the 'Working Files' sidebar displays the project structure: 'index.html' is the active file, and other files like 'embrandt', 'img', 'index.html', and 'site-copy-and-paste-code.txt' are listed under the 'embrandt' folder. The main area is a code editor with the following content:

```
